

## Course Overview

# Drift Diver

### Program #RST.010

Drift diving allows the diver to cover a large expanse of water during a dive, and makes diving where currents are present much more enjoyable. This course is designed to be an introduction to drift diving and to help the student diver develop the skills, knowledge and techniques necessary for safe & comfortable drift diving.

Drift Diving is effortless and relaxing because you simply glide with the current and feel the rush of flying underwater. But, with this type of diving come special procedures that you need to know so you can maximize your fun underwater. From equipment requirements to dive planning, we'll cover all the aspects of drift diving during this course.

During your PADI Drift Diver certification course, you'll learn about drift dive planning, organization, techniques and potential hazards, as well as special equipment and procedures like buoyancy. But it's not all theory because you'll go on two open water dives where you can put your new knowledge into action.

You may count this Specialty certification toward one of the five required Specialties for the Master Scuba Diver certification.

#### Agency Certification

PADI

#### Course Name & Certification Issued

Drift Diver

#### Student Prerequisite(s)

PADI (Jr.) Adventure Diver -or- equivalent

#### Minimum Age

12

#### Class Session(s) (hours)

1 (1)

#### Pool Session(s)

optional

#### Open Water Dives

2

#### Minimum/Maximum Depths

130 ft. maximum  
(70 ft. Jr.)

#### Breathing Gas(es)

Air or Nitrox

#### Required Student Equipment

Basic Scuba Set-up  
Lift bag with finger spool
