

## Course Overview

# Underwater Navigator

### Program #RST.021

Be the diver everyone wants to follow and make your sense of direction legendary with the PADI Underwater Navigator Specialty course. This program includes techniques for navigating open water, wrecks, reef systems, confined spaces and more!

When you're underwater, knowing where you are and where you're going comes in handy, especially if you're looking for that beautiful reef or secret piece of the wreck that you've heard all about. Or more importantly, finding your way back to the anchor line and avoiding a long surface swim at the end of the dive. The PADI Underwater Navigator Specialty course will help you become a pro at finding your way underwater.

During your PADI Underwater Navigator Specialty course, you'll learn underwater navigation dive procedures, techniques, planning, organization and potential problems. You'll also be introduced to natural navigation, underwater patterns, distance estimation and will further your compass navigation skills. You'll put these into practice during your three open water dives.

Your Adventures In Diving Navigation Adventure Dive counts toward your Specialty course. Completion of this specialty certification also counts as one of the five required for your Master Scuba Diver certification.
